

4 Shelf Wire Storage Unit Assembly Instructions

Item: 211-6853

Parts Included

NOTE

Discard shipping spacers from between the shelves.

IMPORTANT

Unpack all contents and confirm hardware matches the Parts Listing.

Step 1

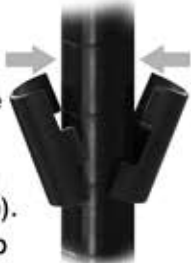

Screw a Leveler Foot into the threaded insert at the bottom of a Lower Upright.

Repeat this step for all four Lower Uprights.

Step 2

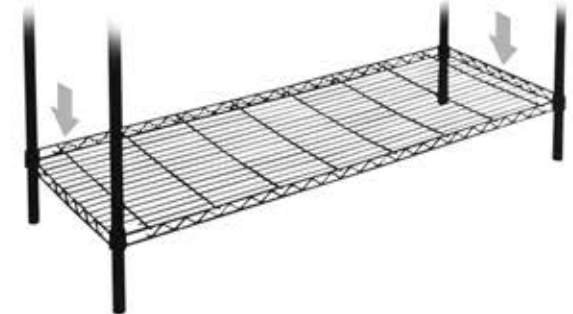

Place 2 Adjustable Sleeve halves at the same desired level near the bottom of each of the 4 Lower Uprights (arrows up).

Slide the Sleeves up and down until they snap into a groove.

Step 3

Slide a Wire Shelf over the uprights and press shelf firmly onto the Sleeves until it is snug.

Repeat **Steps 2 & 3** by positioning a second Wire Shelf over the Lower Uprights and press shelf firmly onto the Sleeves until it is snug.

Step 4

Screw the Connectors into the top of the four Lower Uprights. Then screw Upper Uprights into the Connectors.

Step 5

Repeat **Steps 2 & 3** by positioning the third and fourth Wire Shelf over the Upper Uprights and press the shelves firmly onto the Sleeves until they are snug.

Step 6

Place Shelf Unit where desired and level with Leveler Feet.
